

Cuba and Algeria – a Full Result and Prospects – Leon Trotsky is Alive Again

By Shomit Sirohi

I. The Result of a Mass Protest Revolution in Cuba – Spirit and Absolute (Trotsky adds)

In fact there is a process of revolution in the whole transformative politics of Cuban type – it is in fact revolting from Fidel Castro and Che Guevara photographed recently in India and Cuba and in fact alive and living forces in Cuba and this was the major healthcare event which is part of the ‘theatrical’ process in India – something like a affinity for drugs as pharmaceutical drugs in fact which is found by myself – the process of living in close attention to these details in a father’s health condition going on for ten years. So ten years of experience in fact which others have only hospital attention on.

So in fact the Cuban process is a revolt and has led to the formation of Cuba by a simple report mapping its culture and history, even Spanish language and Fidel’s re-invention of the Cuban formalism – in fact I would argue – Varadero, Santiago de Cuba and Havana as a triad which organises its bourgeoisie in black and white unity.

II. Prospects for Cuba

In fact a lot of constructions of interstitial architecture where hotels are planned as cheap perception, and poor dialectics, and finally the finest hotel life – by a simple method. Opposed to the mainstream of economists, architects and planning utopians which perform miracles only for capitalism. I mean ‘Lire le capital’ is alive again, to give it a future – reading capital as in fact philosophical materialism in Sirohi bound to language, or Spanish language – which means to produce a syntax which then is also syntactical developments of the most beautiful women in Picketing and travel.

III. Algeria – Our Black Lives

In fact black is the fundamental and only Event of the whole Indian revolution – that missed encounter which is now a true encounter.

Algeria is fully in fact scaled to Renaultist dimensions and is something like an architectural modernism mixed with capitalist lifestyle in the sense though of educated and intellectual life by a modern invention – procedure of bus, the series, and shops and houses. The simple Freudian aspects all in place – it is just an intellectual vocation to live in its Arabic.

IV. Reports concluding – statistics for the two true revolutions of the Indian conjuncture – with China as mass line

In fact – public sector merged with cinema developments, and medical developments which then organises a protest dynamic and is then finally a architectural modernism.

Algeria appears when I walk to the left of the central plaza a bunch of old buildings which then leads to the criss-crossing of this long circular squarish area as in fact off on a taxi to the Kasba messianic shopping which is intersected by in fact Spanish architecture and all of housing hotel life is busy in the East with a large number of French-Arabic discussions on Sirohi and Deterior – short cuts in a black life emancipated.
